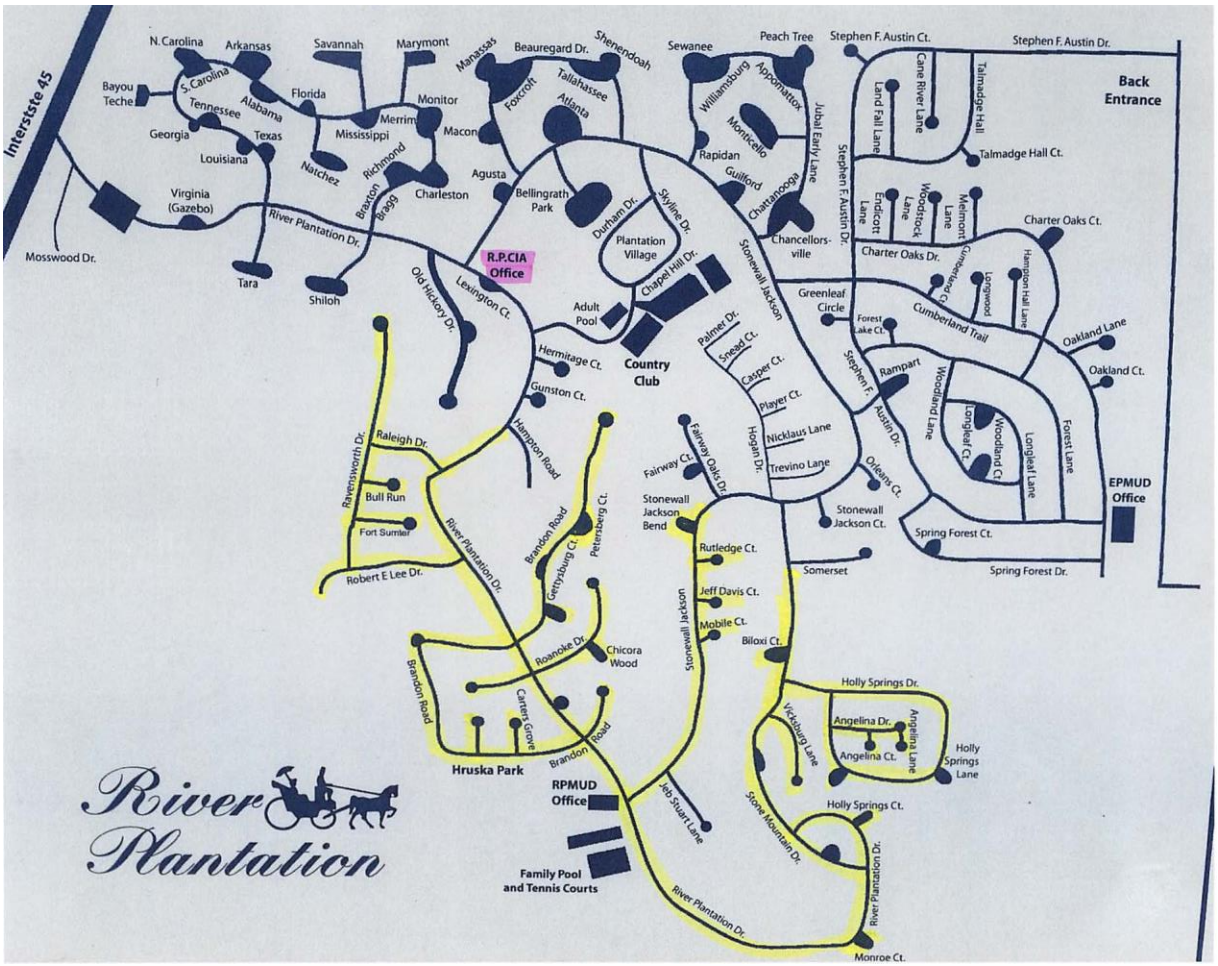
Good Afternoon,

Given the magnitude of the nature disaster that has impacted the River Plantation community, and in concern for the safety of the kids during clean up and reconstruction, we will be making changes to the transportation for the families in the affected areas (see Map).

Every run that services homes in the affected area will have a stop added to the run at the River Plantation community center (Stonewall Jackson & River Plantation Dr.). Students whose stops are in the affected area will be picked up and delivered to the community center.

If a parent wishes to continue to use their previous stop in the affected area, the parent needs to be at the stop for pick-up and delivery. Parents of students attending Peet, CHS 9th and CHS will have the option of informing us in writing (email to aritaylor@conroeisd.net) that they want their child dropped off in the affected area at their old stop without a parent present.

These changes will be in effect for the remainder of the 17-18 school year or until it has been determined that conditions have improved to the point that resuming normal transportation will no longer pose a danger to the children we transport.

Thank you,


Aric Taylor, Asst. Dir. Transportation (North)
